

Monthly Indicators

November 2020

Percent changes calculated using year-over-year comparisons.

New Listings were down 19.9 percent for single family homes but remained flat for townhouse-condo properties. Pending Sales landed at 374 for single family homes and 160 for townhouse-condo properties.

The Median Sales Price was up 11.6 percent to \$650,000 for single family homes and 5.3 percent to \$422,450 for townhouse-condo properties. Days on Market decreased 23.2 percent for single family homes and 31.8 percent for townhouse-condo properties.

Showing activity remains higher than the same period a year ago across most of the country, suggesting that strong buyer demand is likely to continue into what is typically the slowest time of year. With inventory remaining constrained in most market segments, sellers continue to benefit from the tight market conditions.

There are no year-to-date figures for inventory because it is simply a snapshot frozen in time at the end of each month. It does not add up over a period of months.

Glossary of Terms

A research tool provided by the Colorado Association of REALTORS®

| | |
|---------------------------------------|---|
| New Listings | A measure of how much new supply is coming onto the market from sellers. |
| Pending / Under Contract | A count of all listings that went into Pending status during the reported period. Pending listings are counted at the end of the reported period only once. So if a listing goes into, out of and back into Pending status during the reporting period, it is counted just one time. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a leading indicator of buyer demand. The Pending/Under Contract metric includes Pending, Active/Backup and Active/First Right. |
| Sold Listings | A measure of home sales that were closed to completion during the report period. |
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Average Sales Price | A sum of all home sales prices divided by total number of sales. |
| Percent of List Price Received | A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period. |
| Days on Market Until Sale | A measure of how long it takes homes to sell, on average. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and median income by county. |
| Inventory of Active Listings | A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes for sale. |
